

Q1. Create an external table in the default database on data orders which has order id, customer id and order date.

```
CREATE EXTERNAL TABLE default.orders (  
    order_id INT,  
    customer_id INT,  
    order_date TIMESTAMP  
)  
ROW FORMAT DELIMITED  
FIELDS TERMINATED BY ','
```

Q2. Create a Hive or Impala table on data in the training materials 'base_stations' . (Hint: Load the data directly on the table)

```
CREATE TABLE base_stations (  
    zip_code INT,  
    city STRING,  
    state STRING,  
    latitude DOUBLE,  
    longitude DOUBLE  
)  
ROW FORMAT DELIMITED  
FIELDS TERMINATED BY '\t';
```

```
LOAD DATA INPATH '/user/hive/warehouse/base_stations.tsv' INTO TABLE base_stations;
```

Q3. Using Sqoop import the suppliers table directly in hive metastore.

```
sqoop import \  
--connect jdbc:mysql://localhost/loudacre \  
--username training \  
--password training \  
--table suppliers \
```

--hive-import \

--hive-table default.suppliers \

-m 1

Q4. Use Sqoop to import only first_name , last_name , and city from table accounts in AVRO format on HDFS. Create an external Hive/Impala table on it.

```
sqoop import \ --connect jdbc:mysql://localhost/loudacre \ --username training \ --password training \ --table accounts \ --columns "first_name,last_name,city" \ --as-avrodatafile \ --target-dir /user/training/accounts_avro \ -m 1
```

Q5. Use Visualizations on basestations table in Mysql . Save the results in CSV or XLS format.

[https://github.com/WaltWimer/Labs-Iron/blob/main/Week%205/query_result\(3\).csv](https://github.com/WaltWimer/Labs-Iron/blob/main/Week%205/query_result(3).csv)

Q6. Create a table directly from the metastore.

The screenshot shows the Metastore Manager web interface. On the left is a sidebar with a tree view showing the database structure: 'default' database containing tables like 'accountsdevice', 'customers', 'device', 'orders', 'sample_07', 'sample_08', and 'web_logs'. The main panel is titled 'Databases > default > orders'. It has tabs for 'Overview', 'Columns (3)', 'Sample', and 'Details'. The 'Overview' tab is active, showing the table's properties: 'Table', 'ad', 'Mon Aug 03 05:27:16 PDT 2026', and 'text' (Not compressed). It also shows the table's location. Below the properties is a table with 3 columns: 'order_id' (int), 'customer_id' (int), and 'order_date' (timestamp). Each column has a comment link. At the bottom, there is a 'SAMPLE' section stating 'The table does not contain any data.'
